

IPSC 2022

3rd International
Plant Spectroscopy
Conference

We are pleased to announce the **3rd International Plant Spectroscopy Conference (IPSC2022)** **scheduled to take place between September 12-15, in Nantes, France.** This event is part of the biennial conference series, organized jointly with the International Society for Plant Spectroscopy ([ISPS, https://plantspec.org](https://plantspec.org))

Abstract submission is now opened

We encourage everyone to share their research concerning the potential and use of different spectroscopic techniques in various fields of plant sciences by submitting an abstract for oral or poster presentation.

The topics include (but are not limited to):

- FTIR (micro)spectroscopy
- Raman (micro)spectroscopy
- Autofluorescence spectroscopy and imaging
- Mass spectrometry and imaging
- NMR spectroscopy and imaging
- Related chemometric approaches

In addition to scientific sessions, four technical workshops will be organised.

- Multivariate analysis techniques
- Sample preparation
- Spectral technique selection
- Correlative and multimodal imaging

We invite both beginners and experienced researchers to participate. The goal is to discuss, and share experiences and questions about your practice and improve your technical skills and knowledge.”

The deadline for abstract submission is April 15, 2022

Registration will open on 15 February 2022

Updates on the conference, including registration and accommodation, is available at <https://ipsc2022.symposium.inrae.fr/>

A special edition of *Biomolecules* will cover the conference, with discounts for conference participants and an award for the best poster.

We sincerely look forward to meeting you in Nantes for a most stimulating and enjoyable conference.
